IN THE UNITED STATES DISTRICT COURT FOR THE
NORTHERN DISTRICT OF OKLAHOMA

W. A. DREW EDMONDSON, in his)
capacity as ATTORNEY GENERAL)
OF THE STATE OF OKLAHOMA and)
OKLAHOMA SECRETARY OF THE)
ENVIRONMENT C. MILES TOLBERT,))
in his capacity as the)
TRUSTEE FOR NATURAL RESOURCES))
FOR THE STATE OF OKLAHOMA,)

Plaintiff,)

vs.) 4:05-CV-00329-TCK-SAJ

TYSON FOODS, INC., et al,)
Defendants.)

- - - - -

THE VIDEOTAPED DEPOSITION OF
ROGER OLSEN, PhD, produced as a witness on behalf
of the Defendants in the above styled and numbered
cause, taken on the 2nd day of February, 2008, in
the City of Tulsa, County of Tulsa, State of
Oklahoma, before me, Lisa A. Steinmeyer, a Certified
Shorthand Reporter, duly certified under and by
virtue of the laws of the State of Oklahoma.

A P P E A R A N C E S

FOR THE PLAINTIFFS:

Mr. David Page
Attorney at Law
502 West 6th Street
Tulsa, OK 74119
-and-
Mr. Louis Bullock
Attorney at Law
110 West 7th Street
Suite 707
Tulsa, OK 74119

FOR TYSON FOODS:

Mr. Robert George
Mr. Michael Bond
Attorneys at Law
The Three Sisters Bldg.
214 West Dickson Street
Fayetteville, AR 72701

FOR CARGILL:

Ms. Leslie Southerland
Attorney at Law
100 West 5th Street
Suite 400
Tulsa, OK 74103

FOR SIMMONS FOODS:

Mr. John Elrod
Attorney at Law
211 East Dickson Street
Fayetteville, AR 72701

FOR PETERSON FARMS:

Ms. Nicole Longwell
Attorney at Law
320 South Boston
Suite 700
Tulsa, OK 74103

FOR GEORGE'S:	Mr. James Graves Attorney at Law 221 North College Fayetteville, AR 72701
FOR CAL-MAINE:	Mr. Robert Sanders Attorney at Law 2000 AmSouth Plaza P. O. Box 23059 Jackson, MS 39225 (Via phone)
FOR WILLOW BROOK:	Ms. Jennifer Griffin Attorney at Law 314 East High Street Jefferson City, MO 65109 (Via phone)

1 On the solid sides, we -- there's a couple
2 other components. We did both sediments in the
3 river and sediments in Tenkiller. So there's water
4 compartments and then there's sediments compartment.
5 I think I described each of the components in how
6 the waste from the house ends up on the field, runs
7 off, goes into groundwater, eventually into
8 Tenkiller.

09:28AM

9 **Q** Okay. Thank you for the explanation. Now,
10 let me go back to the affidavit and see if I
11 understand what you meant by this language, okay,
12 and if I don't, tell me. When you were talking in
13 your affidavit about showing a direct path from the
14 place of poultry waste disposal to locations in the
15 IRW where contamination is found, you were referring
16 to the various compartments that you had studied and
17 the fact that the chemical signature that you've
18 identified is found in each of those compartments;
19 is that right?

09:28AM

09:28AM

20 **A** That's correct.

09:28AM

21 **Q** Okay. So you were not, sir, claiming to have
22 identified a particular land application site and
23 then traced geographically edge of field runoff from
24 that site to a specific place of contamination;
25 correct?

09:29AM

1 found elemental phosphorus; is that right?

2 **A** That's correct.

3 **Q** Okay. Let me hand you what we've marked as

4 Exhibit 5, which is a document entitled scope of

5 work. Do you recognize these sort of documents? I

10:26AM

6 saw several of them in your production.

7 **A** Yes, sir.

8 **Q** What is a scope of work?

9 **A** That's really the starting point to work with

10 the variety of experts to create a scope of work of

10:26AM

11 what they need to be done and work with them, and

12 there's usually a specific purpose associated with

13 the scope of work. For purpose of this, I'm sure

14 you discussed this with Dr. Harwood, was to develop

15 a molecular tracking method for poultry, specific to

10:26AM

16 poultry waste in the environment, and so this scope

17 of work is a very general statement of what was

18 going to be done. It gives the purpose, a

19 background and then particular subtasks.

20 **Q** Who would have prepared the scope of work?

10:27AM

21 **A** I'm trying to figure out what version of this

22 is. This looks like a very early version because

23 it's very short or it may have been a later version

24 that was attached. I'll read through it and I can

25 tell you what it is, but to answer your question, we

10:27AM

1 worked with both Kent Sorenson and Dr. Harwood, Dr.
2 Sorenson and Dr. Harwood and North Wind to develop a
3 scope of work related to the overall purpose. So if
4 you want me to take some time, I can tell you
5 exactly where in that process this scope was
6 developed.

10:27AM

7 Q Okay. I don't necessarily need to know that.
8 I was just trying to get a feel whether CDM was
9 involved in preparing the scopes of work; is that
10 right?

10:27AM

11 A Yes, and particularly this one, I was involved
12 in it working closely with Dr. Sorenson. I think
13 Dr. Sorenson actually took the first shot at it, and
14 then I reviewed it, Dr. Harwood reviewed it, and
15 North Wind, of course, had to be involved in it.

10:28AM

16 Q Mr. Olsen, you see there are three subtasks
17 that are identified in Exhibit No. 5, this scope of
18 work; do you see that?

19 A Yes.

20 Q Okay. Subtask 2 refers to qPCR, and you're
21 familiar with qPCR?

10:28AM

22 A Yes.

23 Q Is that the technique that Miss Harwood was
24 using to try to identify DNA within bacteria that
25 she could source to poultry?

10:28AM

1 **A** That's correct.

2 **Q** Okay. Subtask 2, was it completed?

3 **A** I know when this was now. This was at the
4 beginning of 2007. So we already had a lengthier
5 scope of work. So this was kind of a supplemental
6 scope of work for costing for 2007 that we put
7 together. As of this day, I think the number is
8 approximately 211 samples that have been analyzed by
9 qPCR techniques.

10:28AM

10 **Q** Okay. Let's talk up here and make our Record
11 clear. Exhibit No. 5, the scope of work for
12 bacteria analysis, refers to the collection of 500
13 samples; correct?

10:29AM

14 **A** Yes.

15 **Q** Okay. Is it your testimony, sir, that as we
16 sit here today approximately 211 of those 500
17 samples have been collected?

10:29AM

18 MR. PAGE: Object to the form.

19 **Q** Did I understand that correctly?

20 MR. PAGE: Same objection.

10:29AM

21 **A** Well, there's more samples now that we're
22 through 2007, and I think it actually talks about
23 that. In addition, over a hundred samples will be
24 collected. I don't know the exact number that were
25 collected in 2007, but 2007 samples were also sent

10:29AM

1 conducted investigation that has found the same
2 chemical signature for poultry waste that you claim
3 to have found in the Illinois River watershed?

4 **A** That signature is unique. No one has ever
5 done that extensive list analysis to do this;

11:53AM

6 however, I base the selection of chemicals on what
7 was in the literature. So it will -- those

8 chemicals that I see in that signature match what's
9 in the literature, but there's no one that's ever

10 done a complete chemical signature that I know of

11:53AM

11 that's published in -- someone may have done it. I
12 don't know.

13 **Q** Are you aware of a single other scientist in
14 the world who claims to have identified this list of
15 25 constituents and the coefficients that you've
16 developed and called that a signature for chicken
17 litter influencing water?

11:53AM

18 **A** I'm not aware of any.

19 **Q** You're the first person in the history of the
20 world to have done that; is that true?

11:54AM

21 **A** Yeah, but I'm not the first person in the
22 world to have created chemical signatures for
23 contamination sources in rivers. That's in the
24 literature. It's done routinely, and it's done for
25 an extensive list of parameters, and that's why I

11:54AM

1 have such an extensive list of parameters, because
2 it will create a unique signature.

3 Q Dr. Olsen, how long have scientists and
4 governmental bodies been studying the potential
5 impact of poultry litter on water quality in the 11:54AM
6 United States?

7 MR. PAGE: Object to the form.

8 A I don't know the exact data. I'd have to go
9 back and look at some of the literature sources.

10 Q You'll agree that work has been ongoing for at 11:54AM
11 least decades?

12 MR. PAGE: Object to the form.

13 A I think it just most recently -- I don't know
14 if it's been going on for decades, I can't determine
15 that, but it's certainly got much more scrutiny in 11:54AM
16 the last few years.

17 Q And during all the length of that study by
18 scientists from other firms and government
19 regulators, no one other than yourself has
20 identified this 25 list of parameters in certain 11:55AM
21 concentrations as a chemical signature for poultry
22 litter; is that true?

23 MR. PAGE: Object to the form.

24 A That's my unique work to develop that
25 signature, just like no one's ever developed a qPCR 11:55AM

1 for chicken, but we did it, and we did a signature,
2 too.

3 Q Would the same be true with respect to the
4 signatures that you believe you've identified for
5 POTWs and cattle; no one else in the world has
6 developed the list of parameters that you believe is
7 distinct and unique for those sources of
8 contamination despite all the years of work on water
9 quality in the United States?

11:55AM

10 MR. PAGE: Object to the form.

11:55AM

11 A People have done the same thing for
12 wastewater, and that's where I got some of my
13 analysis, from one of the professors. I'd have to
14 look to see what parameters he looked at and which
15 ones he used in his analysis to determine whether --
16 he didn't do all 25 like I did, though, you know,
17 but he used the same overriding principles to
18 develop --

11:56AM

19 Q Who is he?

20 MR. PAGE: Would you let the witness answer
21 the question, please?

11:56AM

22 Q I'm sorry, Mr. Olsen.

23 A Dr. Furman (sic) at Furman University.

24 MR. ELROD: Dr. Furman at Furman
25 University?

11:56AM

1 small basins with high flow stations to these
2 stations that are USGS stations on bigger streams.

3 Q I'm asking you about edge of field. Was there
4 meant to be coordination between edge of field
5 sampling and in-stream sampling in terms of 05:48PM
6 geography and temporally?

7 A That's what I'm trying to tell you. The high
8 flow stations were set up specifically based on
9 chicken house density, which has some reflection of
10 edge of field samples that could be taken from 05:49PM
11 applied fields.

12 Q If I look at L3, edge of field, am I going to
13 find that same bacteria subsequently in the stream
14 in L1?

15 MR. PAGE: I'll object to the form. 05:49PM

16 Q Was that your intent?

17 A I don't know exactly the question. I'll try
18 to figure out what -- could you restate that? I
19 don't know if I understand what you are trying --
20 the question. 05:49PM

21 Q If it were possible to dye trace bacteria and
22 you put a dye trace marker on the bacteria colony at
23 edge of field, was it your intent that I would find
24 that same colony of bacteria subsequently in-stream
25 as displayed on L3? 05:50PM

1 **A** That same bacteria, no. That sampling is not
2 meant to do that. Some of the bacteria are probably
3 showing up downstream from the edge of fields, but
4 that was not our intent to try to show that. The
5 intent of the qPCR is to show that, but this is just
6 generally sampling for all bacteria.

05:50PM

7 **Q** How long have you known Dr. Harwood?

8 **A** I first met Dr. Harwood and talked to her
9 probably four or five years ago I think.

10 **Q** And are you the one that brought her into this
11 team?

05:50PM

12 **A** I recommended her, but she was hired directly
13 by the Oklahoma Attorney General.

14 **Q** Okay, but -- but for the fact that you
15 recommended her, she would not be part of the team;
16 isn't that true?

05:50PM

17 MR. PAGE: Object to the form.

18 **Q** You're the one that first brought up her name?

19 **A** Yes, I did.

20 **Q** And you've worked with her on other occasions;
21 is that true?

05:50PM

22 **A** Yes. I think I worked with her once.

23 **Q** Is your income at CDM dependent upon or
24 directly related to in any way bonuses or otherwise
25 the amount of revenue that you generate for CDM?

05:51PM
